“Your Source for Wyoming Labor Market Information”

Who We Are

Research & Planning (R&P) functions as an exclusively statistical entity within the Wyoming Department of Workforce Services. R&P collects, analyzes, and publishes timely and accurate labor market information (LMI) meeting established statistical standards. We work to make the labor market more efficient by providing the public and the public’s representatives with the information needed for evidence-based, informed decision making.

Wyoming Growing and Declining Industries Report, 2025Q2

by: **Laura Yetter, Senior Economist**

In second quarter 2025 (2025Q2), Wyoming had eight growing industries and four declining industries. This marked the second consecutive quarter that Wyoming had more growing industries than declining.

The Research & Planning (R&P) section of the Wyoming Department of Workforce Services has defined *growing* or *declining* industry as an industry's employment level increasing or decreasing for two consecutive quarters by 5% or more compared to the prior the year. For example, all industries that grew or declined in employment by at least 5% from 2024Q1 to 2025Q1 and subsequently from 2024Q2 to 2025Q2 were included in the respective tables in this report. Additionally, only subsectors with employment sizes of 100 or more are included in these tables. Consequently, while employment in other industries may meet the growth criteria, that growth is taking place in industries with employment of less than 100.

Industries are defined by the North American Industry Classification System (NAICS). For this research, growing and declining industries were determined at the three-digit subsector level. For more information on NAICS, please see <https://www.census.gov/naics/>.

The database used to generate this information was the Quarterly Census of Employment and Wages (QCEW) file, which has roughly a half-year time lag from the distribution of this report. Growing and declining industry data are updated every quarter when new QCEW data become available.

Growing and Declining Industries

Historical growing and declining industry data for Wyoming are now available online at https://doe.state.wy.us/LMI/G_DInd/G_D_Industries.htm

Wyoming had eight growing industries in 2025Q2, equal to the prior quarter (see Figure 1, page 4). Specialty trade contractors grew the most, adding 593 jobs over the year in 2025Q1 (a 5.1% increase) and 748 jobs (6.0%) in 2025Q2 (see Table 1, page 5). On average, this subsector added 671 jobs, with an average increase of 5.6%. Other growing industries included support activities for transportation (231, or 13.1%), warehousing & storage (170, or 9.3%), pipeline transportation (165, or 19.9%), and food manufacturing (115, or 15.1%).

Wyoming's eight growing industries in 2025Q2 accounted for 9.9% of all industries and 7.0% of the state's total employment (see Table 3 and Figure 2, page 7).

The declining industries table (see Table 2, page 6) reads the same way, except with negative changes, and therefore, declining industries. There were four declining industries in 2025Q2, down from seven the prior quarter. The greatest decline was seen in sporting goods, hobby, musical instrument, book, & miscellaneous retailers (-190, or -6.3%). The other declining industries were machinery manufacturing (-106, or -14.7%), private households (-34, or -14.3%), and furniture & related product

manufacturing (-12, or -7.8%). The four declining industries made up 4.9% of all industries and 1.3% of total employment.

The *average weekly wage* is calculated by dividing total wages for a particular subsector by the total number of jobs and the number of weeks in the observed quarter. In 2025Q2, the average weekly wage was \$1,307 for growing industries and \$689 for declining industries (see Table 3 and Figure 3, page 7). Overall, the state's average weekly wage for 2025Q1 was \$1,174.

During periods of economic expansion,

the number of growing industries is much greater than the number of declining industries (see Figure 1). For example, the number of growing industries in Wyoming peaked at 26 in 2006Q3 and 2006Q4, compared to three and five declining industries, respectively.

But during economic downturns, there are far more declining industries than growing industries. R&P has defined an *economic downturn* as a period of at least two consecutive quarters of over-the-year decrease in average monthly employment and total wages based on data from the

Shaded areas indicate periods of economic downturn: 2009Q1-2010Q1, 2015Q2-2016Q4, and 2020Q2-2021Q1.

Prepared by M. Moore, Research & Planning, WY DWS, 2/10/26.

Figure 1: Number of Growing and Declining Industries in Wyoming by Year and Quarter, 2005Q1-2025Q2

QCEW. Over the last 20 years, Wyoming has experienced three periods of economic downturn: 2009Q1-2010Q1, 2015Q2-2016Q4, and 2020Q2-2021Q1. During the most recent

economic downturn, which was driven by the COVID-19 pandemic and declining energy prices, Wyoming had 37 declining industries in 2020Q3 compared to just three growing.

^aIncludes both public & privately owned firms.

^bNorth American Industry Classification System.

^cThe percentage for average change is the employment-weighted average percentage change of the current & prior quarters (employment change current quarter + employment change prior quarter) divided by the employment for the current & prior quarters (employment current quarter + employment prior quarter).

Source: Quarterly Census of Employment & Wages.

The average weekly wage is calculated by dividing the total wage for the industry group by the total number of jobs for the industry group & the number of weeks in the observed quarter. Please be aware that average weekly wages at the industry group level are susceptible to wage bias due to sample size, occupational distributions, seasonal pay & bonuses, & keying error.

Prepared by L. Yetter, Research & Planning, WY DWS, 2/10/26.
