Wyoming Unemployment Steady at 3.3% in June 2025

The Research & Planning section of the Wyoming Department of Workforce Services reported today that the state's seasonally adjusted unemployment rate held steady from May to June at 3.3%. Wyoming's unemployment rate was just barely higher than its June 2024 level of 3.2%, but much lower than the current U.S. unemployment rate of 4.1%.

From May to June, most county unemployment rates followed their normal seasonal pattern and increased. Unemployment rates often rise in June as young people get out of school and start searching for work. The largest increases occurred in Albany (up from 2.6% to 3.4%), Big Horn (up from 3.9% to 4.7%), Carbon (up from 3.5% to 4.3%), Converse (up from 3.1% to 3.9%), Fremont (up from 3.6% to 4.4%), Goshen (up from 3.3% to 4.1%), and Sweetwater (up from 3.5% to 4.3%) counties. Teton County's unemployment rate fell from 3.0% in May to 2.3% in June as the summer tourist season got into full swing.

From June 2024 to June 2025, unemployment rates rose in every county, suggesting that the supply of labor has increased compared to a year ago. The largest increases were seen in Goshen (up from 3.0% to 4.1%) and Niobrara (up from 2.7% to 3.7%) counties.

In June, the highest unemployment rates were found in Big Horn County at 4.7% and Fremont County at 4.4%. The lowest rates were reported in Teton County at 2.3%, Crook County at 2.7%, and Johnson County at 3.0%.

Current Employment Statistics (CES) estimates show that total nonfarm employment in Wyoming (not seasonally adjusted and measured by place of work) rose from 301,100 in June 2024 to 305,400 in June 2025, an increase of 4,300 jobs (1.4%).

July unemployment data will be published on August 26, 2025.

Unemployment Rate	3.3	3.3	3.2						
De finitions:									
Employed	All persons who, during the reference week, did any work at all as paid employees, worked in their own business, profession, or on their own farm, or worked 15 hours or more as unpaid workers in a family business.								
Unemployed	All persons who had no employment during the reference week, were available for work, and had made specific efforts to find employment sometime during the 4-week period ending with the reference week.								
Labor Force	All persons who meet the criteria given above as either employed or unemployed.								
Unemployment Rate The number of unemployed as a percent of the labor force.									
Seasonal Adjustment A statistical procedure to remove the impact of normal regularly recurring events (such as weather, major holidays, and the opening and closing of schools) from economic time series to better understand changes in economic conditions from month to month.
